## Our Startups Going Places!

We take immense pride in our startups becoming successful! Here are a few stories to give you a glimpse of where you could probably be as a startup one day! All the best!!

### Sirena Technologies

URL: : <https://sirenatech.com/>

With a vision to bridge the gap between real-world technologies and education in schools, Sirena Tech has brought the use of robotics in the field of education. They have developed Nino A, a completely home grown 4 feet tall interactive bot with possible applications at the Bangalore Airport and the Metros. They have also introduced SKIP (Sirena Knowledge and Information Program) for schools which is crafted to enable students to learn cutting-edge trending technologies which include Humanoids, Artificial Intelligence, Internet of Things, etc.

## More coming up!

- ▶ Workshop on Technology in Agriculture
- ▶ Incubation for women entrepreneurs
- ▶ Mentorship Session with 3M, India
